

The Austin Taylor No.1 cabinet is a compact and versatile enclosure designed for mounting of CATV, telephony or other equipment.

It has an integral base and body for single operation installation. Its compact size when installed (just 600mm above ground) minimises the pillar's environmental impact.

The lift-off cover is easily removed to give excellent 180 degree access to the backboard.

Its slam latch mechanism allows the cover to be replaced without using the key.

Equipment may be mounted on either or both sides of the galvanised steel backboard.

Material

Base: 2.0mm ferritic stainless steel

Cover: 1.5mm ferritic stainless steel

Protection

IP55 in standard format.

Backboard

Galvanised steel backboard as standard.

Ventilation

Convection currents draw fresh air in through louvres at the rear of the cabinet which are protected by insect-proof mesh.

Finish

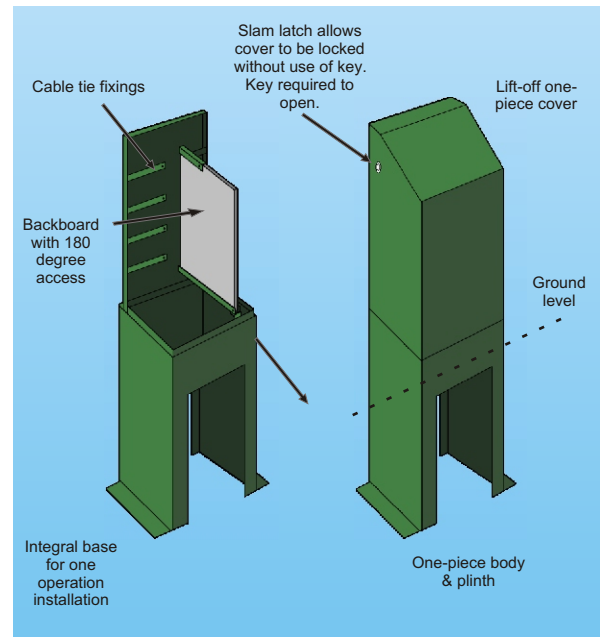

Pre-treatment by chemical etching followed by powder coating with polyester material in customers choice of colour (standard is green).

Multi-colour finishes and silk screened or embossed logos are available on request.

The gloss finish enables graffiti to be removed using mild solvents or mild abrasive compounds.

Standard colour is Green (RAL6009/6)

Dimensions	Width	Depth	Height
Overall	300mm	200mm	1000mm
Installed size	300mm	200mm	600mm
Backboard	n/a	165mm	318mm
