

Manufactured from shock resistant, flame retardant ABS the Austin Taylor Box Connection 201D is supplied fitted with two off Austin Taylor Strip Connection 237A and common earthing point, giving a total capacity of 20 pairs of wiring.

Cable access is via integral knockouts in the lid. The lid is secured to the base using two screws and incorporates a mark up field for pair identification, alternatively standard Strip Designation 51A may be used.

The base is designed to provide generous provision for securing and managing cables.
